

Contents of *Ecological Modelling*, Vol. 61

VOL. 61 NOS. 1/2

MAY 1992

Special Issue

PINOGRAM: A Pine Growth Area Model

R.P. Leersnijder (Wageningen, Netherlands) 1

VOL. 61 NOS. 3/4

JUNE 1992

A solar radiation algorithm for ecosystem dynamic models

N.T. Nikolov and K.F. Zeller (Fort Collins, CO, USA) 149

ECOPATH II — a software for balancing steady-state ecosystem models and calculating network characteristics

V. Christensen and D. Pauly (Manila, Philippines) 169

Large-scale starfish waves and reefal connectance

P.L. Antonelli (Edmonton, Alta., Canada), R.H. Bradbury (Canberra, ACT, Australia), N.D. Kazarinoff (Buffalo, NY, USA), X. Lin (Edmonton, Alta., Canada) and R.E. Reichelt (Canberra, ACT, Australia) 187

Resource utilization, competition, and predation: a model and example from coral reef grazers

T.R. McClanahan (Gainesville, FL, USA) 195

Minimum risk criterion for optimal allocation of crops

Ju.M. Svirezhev (Moscow, Russia) and P. Racsco (Budapest, Hungary) 217

Physiologically based landscape use model for large herbivores

H.J. Loza, W.E. Grant, J.W. Stuth and T.D.A. Forbes (College Station, TX, USA) 227

Possible consequences of a specific interaction between predators and parasites of aphids

P. Kindlmann and Z. Růžicka (České Budějovice, Czechoslovakia) 253

An object-oriented tool for individual-oriented simulation: host-parasitoid system application

J.M. Baveco and R. Lingeman (Amsterdam, Netherlands) 267

Slow-fast limit cycles in predator-prey models

S. Rinaldi and S. Muratori (Milano, Italy) 287

Author Index 309
